READ ME FIRST —

A structure you finish in Canva

1

Duplicate a master

Every layout in chapter 06 exists as a Canva master. Duplicate the page you need — never start from a blank slide.

2

Fill the placeholders

Replace text and image holders only. Fonts, colours and spacing are locked to brand styles — leave them untouched.

3

Check before export

Run the designer checklist in chapter 18. If a slide fails one rule, fix it before it ships to a cohort.

Green **LIVE** chapters are fully specified in this edition. NEXT chapters ship in the full release — the rules here already apply to them.

01

CHAPTER ONE —

Brand Overview

Personality, values and philosophy — the identity every slide must express before a single word is set.

The mentor, not the megaphone

Our archetype is the **Sage**. The career-switcher is the hero of every story; MedSkills Catalyst is the guide who hands them the map. We speak to *one person* — “you” — and back every claim with a concrete next step.

Four brand values

Clarity

One idea per slide, said plainly. Confusion is a design defect.

Credibility

Medical-grade rigour. Honest numbers, real dates, no vanity metrics.

Guidance

Every lesson ends in a next step. We teach the route, not the theory alone.

Momentum

“Upskill to upscale.” Learning should feel like forward motion.

Personality dials

Whitespace first. Then one tint.

Restraint reads as expertise. Learners trust an uncluttered slide the way patients trust a calm clinician. We solve for hierarchy with **space** before we reach for a border, and a border before we reach for a shadow.

PRINCIPLE 01

Clarity over cleverness

If a decoration doesn't aid comprehension, it's noise. Remove it.

PRINCIPLE 02

One focal point

Each slide teaches exactly one idea. The eye should never have to choose.

PRINCIPLE 03

Consistency compounds

Repetition builds recognition. Same styles, every slide, every module.

PRINCIPLE 04

Honest, always

Real data, real language. Trust is the brand's most valuable asset.

Emotional tone:

Calm authority

Reassuring precision

Quiet confidence

Momentum

02

CHAPTER TWO —

Logo Guidelines

The emblem is trademarked and locked. These rules keep it legible, protected and unmistakably ours.

One locked emblem, three surfaces

On white

Preferred. Maximum contrast & clarity.

On pale blue

Soft sections & tinted dividers.

On navy

Heroes, dividers & closing slides.

CANVA NOTE

Import the emblem from **Brand Kit → Logos**. Lock it after placing so it can't be resized off-ratio. Never apply Canva filters, shadows, or the "duotone" effect to the mark.

Protect the mark

Clear space = X

X is the height of the inner flask. Keep this margin clear on all four sides.

96 px
Min. on a 1920x1080 slide

1:1
Locked aspect ratio

Never do this

- | | |
|--------------------------------|-------------------------------|
| ✗ Recolour or re-tint the mark | ✗ Stretch or squash off-ratio |
| ✗ Add drop shadow or glow | ✗ Place on a busy photo |
| ✗ Rotate or crop the badge | ✗ Redraw or recreate it |

Placement rule: the emblem lives **bottom-left** of content slides (footer) and **centred** on covers & dividers. One logo per slide.

03

CHAPTER THREE —

Colour System

Three brand colours from the logo, navy-tinted neutrals, and semantic signals — governed by the 60:30:10 law.

Every colour comes from the logo

Navy
HEX #0A2A43 · RGB 10·42·67
Dark sections, headlines · ~30%

Blue — Primary
HEX #00589E · RGB 0·88·158
CTAs, links, structure

Cyan — Accent
HEX #4AD0FF · RGB 74·208·255
Rationed accent only · ~10%

Ink
#0F1B27 · body

Slate
#5A6B7B · captions

Pale blue
#E8F2FB · tints

Canvas
#F7F9FB · page

Surface
#FFFFFF · cards

Signals & balance

Semantic colours — always icon + label

	Success	#1A8F5C • correct answers, completion, "you're on track"
	Warning	#B45309 • caution, common mistakes, "watch out"
	Error	#B42318 • incorrect, critical don'ts, hard stops
	Information	#00589E • tips, context, "good to know"

The 60•30•10 law

- **60%** — light canvas & white space
- **30%** — navy + blue structure
- **10%** — cyan accent, used sparingly

Why it works: a calm, mostly-light field lowers cognitive load so learners focus on the one idea that's tinted.

04

CHAPTER FOUR —

Typography

One sans for everything, one italic for emphasis. Tight tracking on display, generous leading on body — *confident, not heavy.*

The type scale

H1 Display

H2 Section title

H3 Subsection

H4 Card heading

Body — the default reading size

Caption & footnote text

EYEBROW LABEL

64px · 600 · -0.03em

44px · 600 · -0.02em

32px · 600

24px · 600

20px · 400 · 1.7

15–16px · 400

14px · 700 · 0.18em

DISPLAY & BODY

Instrument Sans

Canva alternative: **Instrument Sans** (native) or Work Sans / Mulish.

THE SIGNATURE

Inter Tight Italic

Emphasis fragment only — *in 90 days*.

Typographic rules

✓ **Sentence case** for all headings & body. Only eyebrows are UPPERCASE.

✓ **One italic fragment** per headline, max. Tint cyan on dark, blue on light.

✓ **Bold one or two words** to guide the eye — never a whole sentence.

✓ **Left-align** body & headings. Centre only covers, dividers & quotes.

✗ No ALL-CAPS headlines, no italics on cyan-over-light, no more than two weights per slide.

THE SIGNATURE MOVE

Break into MedTech sales *in*
90 days.

Upskill to *upscale.*

The italic fragment is the brand's voice made visible. It closes a thought — a small, human flourish against the disciplined sans.

CHAPTER FIVE —

Visual Language

Icons, illustration and photography — the imagery rules that keep every module authentic and uncluttered.

One line weight, no emoji

The check is our glyph

A soft-filled circle (12% opacity) with a rounded tick — blue on light, cyan on dark. It marks value lists, learning outcomes and completion.

Icon spec	
Style	Outline / line
Stroke	1.7px, uniform
Caps & joins	Rounded
Colour	Blue / navy / cyan
Canva family	One line set only
Never	Emoji · mixed weights

Real, calm, on-palette

Illustration

USE Flat medical line

AVOID Novelty 3D

- Flat, clean line work in the brand palette
- Simple molecule / lab / career motifs
- One illustration style across a whole module
- Avoid busy isometric scenes & cartoon 3D

Photography

USE Authentic, natural light

AVOID AI / fake smiles

- Real practitioners in real settings
- Natural light, calm cool grade, high resolution
- Diverse, respectful representation
- Avoid AI-looking people, staged clinics, heavy filters

CANVA NOTE

Prefer Canva's **Photos** → **"Healthcare"** collections filtered to natural, documentary shots. Apply the brand's cool grade sparingly — never a heavy preset. Add photos to the Brand Kit so the team pulls from one approved set.

CHAPTER SIX —

Layout System

One grid, generous margins, and a master layout for every slide type and educational module needs.

06

The 1920x1080 grid

Canvas	1920 x 1080
Columns	12 • 20px gutter
Side margins	120px
Top / bottom	88px
Spacing base	8px scale
Radii	8 / 12 / 20 / 28

Footer band holds the logo (left), chapter (centre) and page number (right).
Content never crosses the dashed safe area.

Twenty master layouts

01 Title

CHAPTER SEVEN —

Components

Reusable building blocks — rendered live from the real MedSkills Catalyst design-system code.

07

Buttons, badges, cards & stats

BUTTONS

Enrol now

Learn more

Skip

One primary action per slide. Secondary supports; ghost is for low-priority links.

BADGES & PILLS

Module 1

Completed

Review

Missed

Optional

Semantic pills always read with their label — never colour alone.

CARD TONES

Surface

Pale

Navy

Hairline—first elevation. Pale for soft sections, navy inverts for emphasis.

STATS

DURATION

90 min

FORMAT

Live

COST

Free

Honest values only — real durations and dates, no inflated counts.

Callouts that teach

TIP

Lead with the outcome, then the method. Learners remember the "why" first.

WARNING

Don't crowd a slide past six lines. Split it — density kills retention.

EXAMPLE

"A rep who tracks 5 accounts weekly closes 30% faster." Concrete > abstract.

The route matters more than the theory.

Quote block — centred, cyan mark

PROGRESS

Module 4 of 6

STAT

3x

recall when paired with a visual

The designer checklist

- ✓ One idea per slide — a single focal point
- ✓ Only Instrument Sans + the italic fragment
- ✓ Body text ≥ 24px; headings sentence case
- ✓ Semantic colour always paired with a label
- ✓ Max 6 lines; generous margins respected

- ✓ Built from a master layout, not a blank page
- ✓ 60:30:10 colour balance holds
- ✓ Logo placed correctly, clear space intact
- ✓ One line-icon family, no emoji
- ✓ Footer: logo, chapter & page number present

If a slide fails one line, fix it before it ships. Consistency is the brand — *upskill to upscale*.

Build on-brand, every time.

This handbook is the single source of truth for every MedSkills Catalyst deck. Keep it open beside Canva — *upskill to upscale.*
