

MEDSKILLS CATALYST · MEDTECH REFERRAL INITIATIVE

Campus Referral Partners

A simple, no-obligation way to open MedTech career doors for your students. You know students who are looking for direction — we run the programs that give them one. When a student wants to build a MedTech career, simply send them our way. We take care of the rest.

● [Refer a Student — We Handle Everything Else](#)

What this partnership is

An open referral bridge between your campus and the rapidly growing Medical Devices (MedTech) industry. Placement officers, professors, and staff simply connect interested students to Medskills Catalyst — nothing more is asked of you.

What it is not

No targets, no quotas, no timelines, and no formal commitments. You refer whenever a genuine opportunity arises — whether that is one student or one hundred. Every referral is valued, and our team keeps you informed at every step.

Three Simple Steps

Referring a student takes minutes — and our core team handles everything that follows.

Share

Tell students and colleagues about Medskills Catalyst programs — a mention in class, a notice board, or a WhatsApp forward is enough.

Refer

When a student is interested, connect them to us by email or phone — or simply share their details with their consent.

We Take It From There

Counselling, enrollment, training, and mentorship — our core team guides every referred student personally and keeps you updated on their progress.

— A PARTNERSHIP WITHOUT PRESSURE

No Targets. No Commitments.

Just a trusted channel between your students and the MedTech industry — open whenever you need it.
